

TA Check-in for the week of January 25th

- Monday: 7:30pm – 8:15pm
 - Century
 - U of M TC
 - Winona State
 - MSUM
 - Concordia
- Wednesday: 7:30pm - 8:15pm
 - Normandale
 - Hill Murray
 - Hamline
- Thursday: 12:00pm - 12:45pm
 - U of M Morris
 - U of M Crookston

PDR Feedback

- I have sent you guys my PDR feedback
 - Please let me know if you could not see my comments or if anything I wrote was unclear.
- Overall, teams seemed to be in a good place.
 - Your priority moving forward should be constructing prototypes of these proposed designs.

Check in Prompts

- Now that the PDR is complete, what are your next objectives?
- Have you:
 - ordered more sensors?
 - determined your “flight plan”?
 - moved any of your design away from the breadboard to something more permeate (like a protoboard)?
 - tried flying with any of your sensors?
 - practiced taking pictures and video with the drone?
 - Vertical and Horizontal?

Things to Consider:

- Solid sample collection, a sticky situation...
- Specialized pilots?
 - A camera man and a sample collector?
- The Fly off will take place in about a month and a half from now in mid-March.
 - You should begin to consider what your final design will be.
- In order to better “test your sensors in action” you should consider having a near final design completed by late February.

Questions For Me?
